

From Logs To Split Firewood Fast....!

MULTITEK MODEL 1616 EZ FIREWOOD PROCESSOR

Shown with 34 hp Kohler gasoline engine

Ergonomic operator safety station with 4-way Joysticks

Shown with optional 20' pivot axle conveyor

Outstanding Features

The Multitek 1616 EZ Firewood Processor has many features that are well suited for the growing firewood producer. This machine features a rugged built 3-strand hydraulic folding log deck for processing logs up to 20 ft (6.1m) in length and up to 18" (45 cm) in diameter. The 1616 EZ firewood processor is built on the same robust mainframe assembly as on the larger 1620 SS Model. This workhorse is professionally designed to ensure maximum uptime and maximum productivity for your firewood business. The 1616 EZ is available with the highly portable 15' (4.57m) integral conveyor system or you can upgrade to a larger 20' (6.01m) or 30' (9.14m) stacking conveyors.

Economics and Engine Options

Increase production and reduce labor cost with the 1616 EZ. This machine is available with several different engine options to match your production needs and personal preferences. Diesel engine options include a 35 hp Yanmar or Kubota diesel, while gasoline options include a 34 hp Kohler gasoline engine, or a 28 hp Subaru or Honda engines. The 1616 EZ is designed to produce between 1.5 and 2.5 full cords of firewood per hour, with this in mind the machine consumes approximately 1.2 gallons of Diesel (4.5L) or 1.35 gallons (5.11L) of gasoline per hour. The 1616 EZ fuelwood processor features a 20" saw bar with a 3/8 pitch sawchain that under normal conditions requires sharpening approximately every 8 hours of use. Operations of this machine is simple using the two 4-way joysticks that allow the operator complete control of production. The operator can adjust length of firewood block and size of firewood block with simple adjustments using the 4-way joysticks.

Operator Ergonomics & Safety

The operator of the machine is behind a safety shield allowing clear visibility of the complete process. This firewood processor is a very safe operator friendly machine with ample safety measures in place. For our European customers, we also offer the machine with a CE Mark kit that has additional measures of safety including safety shut-off's on both sides of the machine and additional CE required decals. The 1616 EZ is among the safest and easiest to use machines in the world.

Performance

The Multitek 1616 EZ firewood processor is the ideal machine for the growing firewood business. It is simple to use, easy to maintain, and robust for years of trouble free service. From the forested regions of Ireland to the ironbark regions of Australia and Korea, the 1616 EZ is sure to be a performing tool to help you grow your firewood business.

FIREWOOD PROCESSOR MODEL 1616 EZ

PERFORMANCE:

- Production Rating in US Cords: 1.5 – 2.5 Full Cords Per Hour
- Production Rating in Cubic Meters: 5.5 m³ to 9 m³ Per Hour
- Splitter Cycle Time: 5.5 Seconds
- Maximum Log Length 20' (6.09 m)
- Maximum Log Diameter 18" (45.72 cm)
- Minimum Log Diameter 3" (7.62 cm)
- Split Chamber 24" (61 cm)
- Split Force 20 Ton

SPECIFICATIONS:

- Transport Length: 24' (7.3 m)
- Transport Width: 7' 5" (2.28 m)
- Weight: 5,100 lbs (2,313 kg)
- 2+5/16" Tow Ball or Euro Tow Ring
- 1 Year Warranty
- 20 Gallon Steel Fuel Reservoir
- 60 Gallon Steel Hydraulic Tank

PROCESSOR OPTIONS:

- Engine Options: 35 hp Kubota (26 kw) Diesel
 - 35 hp Yanmar (26 kw) Diesel
 - 34 hp Kohler (25 kw) Gasoline
 - 28 hp Subaru (21 kw) Gasoline
 - 28 hp Honda (21 kw) Gasoline
- Integral 15' (4.57 m) Vulcanized Belt Conveyor
- Separate 20' (6.09 m), 30' (9.14 m) conveyors
- 3-phase electric power in lieu of engine
- Extended live deck
- Night Processing Light Kit
- CE Mark for European Union Applications
- Interchangeable 4, 6, 8, way splitting wedges
- Engine Cover
- Full Engine Enclosure

Multitek is a pioneer of quality fuelwood processing equipment and has been designing and manufacturing firewood processors for 30 years. Multitek Firewood Processors are the only firewood processors in the world for handling and processing low grade crooked hardwood logs. Only the larger models have the unique patented shuttle-grapple which make it possible for you to efficiently produce firewood from low grade logs.
